Jennifer Nicole Lee

Jennifer has become an icon for women in over 110 countries with her amazing 80-pound plus weight loss success story. Jennifer was not always an incredible fitness mogul. She started out as a fat and frumpy mom who was unhappy and miserable with herself every day. It all changed for her one day when she saw herself in the infamous pink bikini. She picked up the weights and started perfecting what we now know today as JNL Fusion! Jennifer is a true role model for anyone who is looking to become sleek and sexy.

Jennifer has been featured on multiple major national talk shows and has graced the cover of over 45 magazines including Oxygen, Fitness Rx, and Powerhouse Gym.

Dear JNL Fusion Fitness Friend!

Congratulations on taking control of your health and fitness future by using my JNL Fusion Workout Method! You have made a smart and powerful investment in your well-being! I know what it feels like, firsthand, to be overweight and out of shape. This frustration fueled my fitness passion to create a super effective training method that is efficient and challenging, yet also extremely fun and rewarding! As a busy mom and wife myself, with a strong desire to maintain my fitness level, I can tell you that JNL Fusion does work! All you have to do is press play! I'll be your VIP Celebrity Fitness Coach, training you all the way to your utmost weight loss success! I'll show you all of my methods for creating an award-winning, super sexy, strong, sleek physique all in the comfort of your own home! So whether you want to lose a little or a lot of weight, tone up a bit, or increase your endurance level, you can achieve all of your fitness goals with JNL Fusion, as it's functional training at its best. I applaud you for making the personal choice to better yourself with my JNL Fusion workout program. Remember, if I can do it, you can do it, too! I am always here rooting for your weight loss and body transformation success! And as I always say, "*strong is the new skinny*" and "*never give up, never give in, and always train to WIN!*"

I believe in YOU!

What is JNL Fusion?

JNL Fusion is a fitness revolution created by International Fitness Celebrity Jennifer Nicole Lee. JNL is a busy mom and wife, knowing firsthand what it is like to not have enough time to work out. So, she created the JNL Fusion Workout Method to give you maximum results in minimum time. She also understands that you don't have to have an expensive gym membership, or trainer, to get amazing, jaw-dropping results. JNL Fusion is a mix of the most efficient exercise types including kickboxing, karate, plyometric training, and body sculpting. It will give you a sizzling hot body with results that are immediately noticeable. This program works so well because of the *fusion* of weights combined with quick bursts of cardio to create this ground-breaking method! With Fusion, you will not get big and bulky. You will get TNT--tight and tiny! The JNL Fusion method not only makes you look and feel better, but also makes you both mentally and physically stronger by challenging you in new and innovative ways that people of all fitness levels can enjoy. Remember, "strong is the new skinny"! With JNL Fusion, your body will get the attention and respect it demands!

“With the JNL Fusion Method, you can expect to not only lose weight, but also gain energy, stamina, and endurance.”

- JNL

What can I expect?

JNL Fusion is unlike any other exercise program in the world, with a total of 12 unique workouts to get your body strong and sexy. Since no workout lasts longer than forty-five minutes, you will get maximum results in a minimum amount of time with JNL Fusion.

We know that not everyone is created alike and that is a good thing. This fitness revolution is designed to work for everybody, no matter what your fitness level.

Each section is broken down into thirty-second intervals. We know you can do absolutely anything for thirty seconds and that is why this program will work for you. The cardio blasts are one of the signature characteristics that make JNL Fusion so powerful. Right after thirty seconds of strength training, you transition with speed and agility to your cardio blast, forcing your heart rate back into the fat burning zone. From alternating strength and cardio, you will build sleek, sexy muscle tone, which will burn off ugly fat long after you are done working out.

With the JNL Fusion Method, you can expect to not only lose weight, but also gain energy, stamina, and endurance. You will also gain a new identity as an “athlete”, as you will be treated as one when performing the workouts.

We don't like it when people waste our time, so that is why we promise not to waste yours. You have already decided to get out of your fat suit. Now get up off that couch and start achieving the sexy body of your dreams!

“Fitness models have more fun, because life is more fun when you are fit!”

- JNL

JNL SIGNATURE MOVES

1 SNATCH AND GRABS

TARGET MUSCLES:

This combination uses all leg, core, and shoulder muscles, but especially quadriceps, hamstrings, and abs, adding quality to your speed and agility.

SET UP:

Start with your glutes out, hamstrings parallel to the floor, chest and chin up, fingers touching the floor, or as low as they can go.

ACTION:

Fire up your quads by “pouncing” forward and back. Have more speed at the beginning of your move and then land gently. Use your arms for powering up and then landing softly with balance and control.

TIP:

Your goal is to jump up as high as you can, and travel as long as you can, calling upon your major leg muscles, all while using your core for stability and your arms for added momentum. This is one of JNL’s all time favorite moves, as it truly is challenging and makes you stronger with every “Snatch & Grab”!

2 TITANIUM TUCKS

TARGET MUSCLES:

Truly a full body toner, this move targets the shoulders, biceps, triceps, upper back, lower back, calves, quadriceps, and the entire core, especially the hard to hit area of the lower abs.

SET UP:

Inhale, bringing your arms up and then bend over at the hips. Firmly plant your hands onto the floor, gripping the floor with “starfish” hands, fingers fully spread out. Bend one leg at the knee, lifting the toes up off the ground while the other is firmly placed on the ground.

ACTION:

At the beginning of the 30-second interval, jump on your leg forward and back. Switch to the other leg after 15 seconds.

TIP:

The goal of this exercise is to move the one leg that’s on the floor forward and back as far as you can, making the knee go into your chest as much as you can, and then pushing it out as far as you can, while maintaining your speed of this move. After 15 seconds, the goal is then to switch to the other leg. After the 30 second interval is done, bring both feet together, lift your chest, chin and head up, and slowly stand up.

JNL SIGNATURE MOVES

3 HOT COALS

TARGET MUSCLES:

Engaging nearly all of the muscles in your body, this move targets the shoulders, biceps, triceps, upper back, lower back, calves, quadriceps, and the entire core, especially the hard to hit area of the lower abs, quads, hamstrings, and calves.

SET UP:

Similar to the Titanium Tuck set up, inhale, bringing your arms up, and then bend over at the hips. Firmly plant your hands onto the floor, gripping the floor with “starfish” hands, fingers fully spread out. Bend one leg at the knee, lifting the toes up off the ground, while the other is firmly placed on the ground.

ACTION:

For the entire 30-second interval, alternate toes up off the ground. Imagine that you have hot coals underneath your toes and you don’t want to land on them, but for maybe a split second. Power up off the ground with your toes, snapping your heels into your hamstrings, almost kicking your glutes.

TIP:

Enjoy this fun and innovative movement by allowing your head to dangle in between your shoulders and arms and actually watch your feet kick up and down. Work towards keeping your feet up and off the “hot coals” as much as you can by shifting your weight to your upper body, engaging your shoulders, biceps, triceps, upper back, lower back, and abs!

JNL SIGNATURE MOVES

4 SEXY SCISSORS

TARGET MUSCLES:

Sexy Scissors targets your shoulders, biceps, triceps, upper back, lower back, core, quadriceps, hamstrings, and calves. It also increases your heart rate, so it engages the most important muscle--the heart!

SET UP:

Stand with one leg in front and one in back, with knees slightly bent. Alternate arms, one above head, and one below.

ACTION:

Switch arms from above to below, keeping them strong, while you alternate your legs.

TIP:

Aim to keep your athletic abilities in control during this move, not allowing yourself to get lazy or too loose in execution. Focus on strong plyos, springing up and then switching legs in mid air, while also alternating your arms swiftly and purposefully. Aim to land gently on your feet and then power up.

JNL SIGNATURE MOVES

5 JNL FUSION JACKS

TARGET MUSCLES:

This calorie crusher is a new take on an old school classic exercise. This exercise targets shoulders, chest, back, quadriceps, hamstrings, and also calves.

SET UP:

Stand with feet together and knees slightly bent, with arms down.

ACTION:

Power up, touching hands at top of movement, widening your legs. Then come back to starting position, powering your legs out, pushing arms out in front.

TIP:

Aim to have total control of this exercise, not allowing yourself to get lazy. Engage all of your muscles in this movement, keeping your movement big and powerful.

6 FUSION GLIDES

TARGET MUSCLES:

This powerful glide targets inner thighs, outer thighs, shoulders, biceps, triceps, abs/core, quads, hamstrings, and calves.

SET UP:

Inhale up and squat down. Place arms in front and “starfish” hands with fingers spread out. Keep your abs in tight and kick one leg out to the side.

ACTION:

Keeping your upper body strong and locked in, briskly switch your legs from side to side, “gliding” from one leg to the other.

TIP:

The goal of this move is to keep your glutes down as low as you can to the ground, keeping your upper body strong, as it holds you up. Work on building up your speed, as you transition from one leg to the next. Focus on kicking your leg out as far as you can on each move.

JNL SIGNATURE MOVES

7 FUSION SKIERS

TARGET MUSCLES:

This set of moves fires up the quadriceps, hamstrings, glutes, abs/core, shoulders, biceps, triceps, upper back, lower back, and chest.

SET UP:

Place a towel on floor. Get into “skier” position, with knees slightly bent, glutes out, hamstrings almost parallel to floor, with arms in flexed position next to body.

ACTION:

“Ski” up and over the towel, mimicking the same movement as an Olympic skier, keeping your legs strong with each plyometric jump. Jump over the towel, landing gently with control. Power back up and over, using your arms as momentum to “ski” over the towel, going from side to side.

TIP:

Your goal here is to perform a power jump plyo up and over the towel, landing with control. Try not to rest too much once you get over the towel, and jump back over to the other side. Work on increasing your speed and agility while you swing your arms to power you over.

JNL SIGNATURE MOVES

8 FUSION FOUR

TARGET MUSCLES:

This works all 4 limbs, thus the name Fusion Four. It targets your arms and legs, but most importantly your entire abs/core.

SET UP:

Hold weights in your hands, hands above your head, and elbows bent to 90 degrees. Stand with legs shoulder width apart.

ACTION:

Alternate bringing your elbows to opposite knees.

TIP:

Focus on not getting lazy close to the end of your 30 second intervals. End the circuit with the same energy as when you started. Bring your knees up as high as you can.

9 FUSION HOPSCOTCH

TARGET MUSCLES:

This power combination targets your entire body, attacking the fat, as it's a cardio calorie incinerator! It hits your calves, legs, and arms.

SET UP:

Stand on one leg with the opposite arm up.

ACTION:

Imagine doing a hopscotch move, where you jump on one leg for 2 hops, then place both feet down, hopping on both feet, alternating back onto one foot for 2 hops.

TIP:

Focus on having fun with this move, and really swinging your arms for extra calorie burn.

JNL SIGNATURE MOVES

10 JNL FUSION POWER PLIÉ PLYOS

TARGET MUSCLES:

One of JNL's all time favorite JNL Fusion Cardio bursts, these moves target the hard to hit areas such as the inner thigh, the outer thigh, quads, hamstrings, and glutes! It's an all leg toner!

SET UP:

In a plié open legged squat, aim to touch the floor with one hand, while keeping your chest and chin up.

ACTION:

From your starting position, jump up into a plié plyometric, landing back into the same starting position, except for alternating your hand onto the ground.

TIP:

Looks difficult, but this move is as easy as 1, 2, 3! Just focus on really powering up on the plyo jump and switching your legs in midair. Aim to jump as high as you can, calling upon your deep leg muscles. For beginners, you can simply place your hands on your front thighs, instead of touching the floor. For the advanced, you can power up both arms on the up move, reaching for the sky!

JNL SIGNATURE MOVES

11 NO LIMIT JUMPS

TARGET MUSCLES:

This jump engages all major leg muscles, especially quads, hamstrings, glutes, and inner and outer thighs.

SET UP:

Sit down into a squat position, with hands touching the floor (advanced), or placed onto the front of your thighs (beginner).

ACTION:

Powering up with all of your might, jump up as high as you can, reaching up all the way with your arms!

TIP:

Your goal is to jump as high as you can, while landing as gently as you can. This move is to help you realize that there are no limits. You can reach as high as you push your body to go!

JNL SIGNATURE MOVES

12 CORE AND QUAD KICKS

TARGET MUSCLES:

Exactly as the name says, this awesome move hits your core and quads, while also engaging your shoulders!

SET UP:

Sit down into a “crab position” with legs out in front of your body, abs pulled in tight, and arms strong, holding your chest up and out.

ACTION:

For 30 seconds, kick your legs out, alternating them one kick at a time.

TIP:

Focus on keeping your abs in tight, upper body strong, and kick up as high as you can! As for your hands, place your fingers pointing towards your glutes.

13 HALF BURPEES

TARGET MUSCLES:

Taken from the old school burpee, JNL added more intensity to keep your body guessing and to give you better results!

SET UP:

Squat down, with knees bent, touching your elbows.

ACTION:

From your start position, kick out both of your legs, and then bring them right back in as fast as you can with the most control possible.

TIP:

Practice makes perfect! The more you do, the better you will get. Keep your chest and chin up, and power your entire lower body away from your upper body. Then transition using speed and agility, bringing your legs back in.

14 FUSION EXPLOSIVE JACKS

TARGET MUSCLES:

This move targets both your lower and upper body, especially your inner thighs, outer thighs, shoulders, and chest.

SET UP:

Start with legs together and hands to your sides.

ACTION:

Spring up into a full body jump, clearing your legs totally up off the ground, into a jumping jack movement. At the top of this move, your hands should be touching above your head and your legs up and pointing out.

TIP:

Aim to land softly and even bend a bit at the knees. Call upon your glutes and hamstring muscles to power you up as high as you can go, using your arms for added momentum.

MEASURE YOUR SUCCESS

LET'S GET THOSE PHOTOS

You are about to get into the best shape of your life, so let's make sure you track it! In order to track your progress, you are going to start with your "before" photo. Follow these easy guidelines to get the best photos.

1. CLOTHES:

Wear a swimsuit, or something similar, in order to clearly determine the areas that need your focus. The more skin you see, the better. It will help you to fully see your complete transformation later. If you're a male, wear shorts and take off your shirt for photos. Ladies, wear a sports bra and shorts or a bikini so that your waist, belly, and thighs are visible.

2. BACKDROP:

You want your backdrop to be as plain as possible. Pick an uncluttered spot for your photos. We recommend using a white wall.

3. ANGLES:

You can't take too many pictures. The more you have, the more you will be able to reference later. You will definitely want to take a few front shots with your hands on your hips, some side shots with both hands on your sides, and some back shots with your biceps flexed and with your hands on your hips. Set your phone or camera to portrait mode (not landscape). Make sure you can see yourself head to toe, while still posing close enough to see details.

4. POSE:

You want to see exactly how your body looks at rest, so don't suck in or push out. This will help you see how much tighter and leaner you become with JNL Fusion.

5. SUCCESS:

Take photos in the same clothes, poses, and circumstances, using the same background, every 30 days, to see your great progress and success! Once you have made it to the end, go ahead and take your incredible "after" photos in which you will want to mimic the poses you did in your "before" photos to get the best comparison possible.

MEASURE YOUR SUCCESS

Don't forget that you are going to want to see a calculated result, as well. We have included our Measurement History card for your convenience. You will measure each area at its widest point to get the most accurate reading. Write down your "before" measurements the same day you take your photos. Likewise, write down your "after" measurements the same day you take your "after" photo.

MEASURING YOUR WEIGHT

Use the same scale each time you weigh yourself. Make sure you are wearing the same clothes each time you weigh yourself. The clothing should be as light as possible or, better yet, wear no clothes at all. Choose an accurate and reliable scale. Make sure it measures half-units (1/2 lb.) accurately. Do not put the scale on an uneven or soft surface, such as carpet.

When should you weigh? Ideally, you should measure your weight in the morning. If you can't do that, then try to weigh yourself at the same time each day. It's normal for most women to gain a little weight before their period. Put off weighing yourself until after your period.

How often should you weigh? Weigh yourself once a week, at the same time of the day. Body weight, by itself, is not the best way to see your true transformation. This is because when you burn fat and increase your muscle mass, you may weigh a bit more even though your body is getting tighter and smaller. Muscle tissue is more dense than fat tissue, so weighs more. But that's okay—you want more muscle and

less fat! That's the reason it's important to also measure your body in inches.

MEASURING YOUR INCHES

All you need is a measuring tape and a friend who is familiar with the directions below:

1. Biceps (right and left arm) measurement: Flex the biceps muscle and measure exactly at the peak (the spot between the shoulder and the elbow)
2. Chest measurement: Measure around your chest, across both nipples. Make sure the tape is flat to your body and perpendicular to the floor. Hang your arms down so you can get the lats (back muscles) in the measurements.
3. Waist measurement: Measure your waist by placing the measuring tape exactly across the belly button (including the love handles). Make sure the tape is flat to your body and perpendicular to the floor.
4. Hip measurement: Stand with feet close together. Measure the widest part of your butt and keep the tape flat to your body and perpendicular to the floor.
5. Thigh (right and left) measurement: Stand with feet shoulder width apart with your weight evenly distributed. Measure the middle part of your thigh (spot 1/2 way between the inseam and the knee).
6. Calf (right and left) measurement: Stand with feet shoulder width apart with your weight evenly distributed. Measure at the peak of the calf.

**Remember to be consistent with your measurements. Measure your body at the exact same place every 30 days, starting on Day 1.

STRATEGIES FOR SUCCESS

How many times have you started an exercise program and then just quit? Well, you're not alone! Many people start with great intentions but soon lose motivation and end of quitting altogether. We want to see you succeed every step of the way, so we put together eight tips that we have found useful for starting and sticking with the JNL Fusion 8-week plan.

JNL Fusion Introduction Videos - If you are new to JNL Fusion, follow along with the introduction video entitled Fusion Intro, along with Fusion Basics which demonstrates JNL's Signature Moves. In the beginning, it might feel a little overwhelming, but these tools will help.

Modify If Needed -In each one of the JNL Fusion workouts there is someone performing the modifications, making the workout easier on your joints and decreasing the range of motion. You can choose to follow all of them, or simply modify the moves that you don't feel comfortable with. It is a great option for beginners. Consider it a building block to work up to the level of the group. Remember, slow and steady wins the race!

Maintain Your Form -It is important to maintain proper form to achieve the best results possible. Pay close attention to the instructions during the workout. You will be guided on how to properly breathe and maintain correct posture while performing the JNL Fusion moves. You will not only maximize your core strength and endurance, but also accelerate your fat burn- tenfold!

Wear Good Shoes- Be sure to wear a good, supportive pair of well-fitting cross-training shoes that provide support and allow you to move and jump side to side.

Sleep Well -Get at least eight hours of sleep each night. Sleep not only increases your calcium retention to help maintain your bone mass, but it also promotes fat loss, reduces fat storage, supports your immune system, and keeps your organs operating smoothly. When you sleep, you also produce most of your growth hormone.

STRATEGIES FOR SUCCESS

Drink Lots of Water -Drink water all throughout the day: before, during, and after workouts. Drinking water helps control appetite.

Track Your Results -Your body will start showing positive improvements from the day you begin JNL Fusion, so capture your transformation immediately. On Day 1, take a "before" photo of yourself and document your starting measurements and weight on the measurement tracker. Continue weighing, measuring, and taking progress photos every 30 days to see your transformation. This way, you will stay motivated to reach your fitness goals!

Also, be sure to pay attention to inches, photos, and other non-scale victories. Weight is not the best indication of your success in the short term. The scale only tells part of the story. Just as a pound of feathers and a one-pound brick are not the same, your body's composition will also not always be the same. As you lose body fat and gain lean muscle mass, it will prove difficult to use the scale as a tool to properly assess your progress. The scale paired with body fat testing will prove to be far more effective in determining results.

Track Your Exercise -Track your exercise progress by keeping a working journal. This can make or break your fat loss progress! Think of the journal as a road map. It's going to show you the route, help you avoid becoming sidetracked, and keep your final destination in focus. If you lose direction, consult your journal. If you lose your purpose, consult your journal. Seeing your progress in your journal will help you to be more successful in achieving your dream body.

Become a Leader -The absolute best way to ensure your success with JNL Fusion is to become the leader of a group. Find co-workers, friends, neighbors, or family

members who want to achieve the same type of goals that you do. Be the point of contact for the group. Meet every day or every other day to share your achievements and challenges. This way your sense of responsibility for the goals that you desire is at its highest.

Take Small Steps -Make this JNL Fusion journey small and temporary in the beginning. Don't look at a diet change and a new exercise routine as something you need to commit to for six months, much less the rest of your life. Look at it as a test drive of just eight short weeks.

It is important to proceed with caution. While it may be tempting to reduce caloric intake even further, thinking you will achieve even greater results, don't do it. Attempting to eat less food while doing these high-impact workouts will eventually slow your metabolism and force your body into a plateau. This could result in lost weight being regained.

“Compete only with yourself, by pushing yourself always to the next level, and one day you will be looking over your own empire.”
